

# Do You Trust or Do You Know?

AVERAGE ROI  
IS 3 MONTHS!

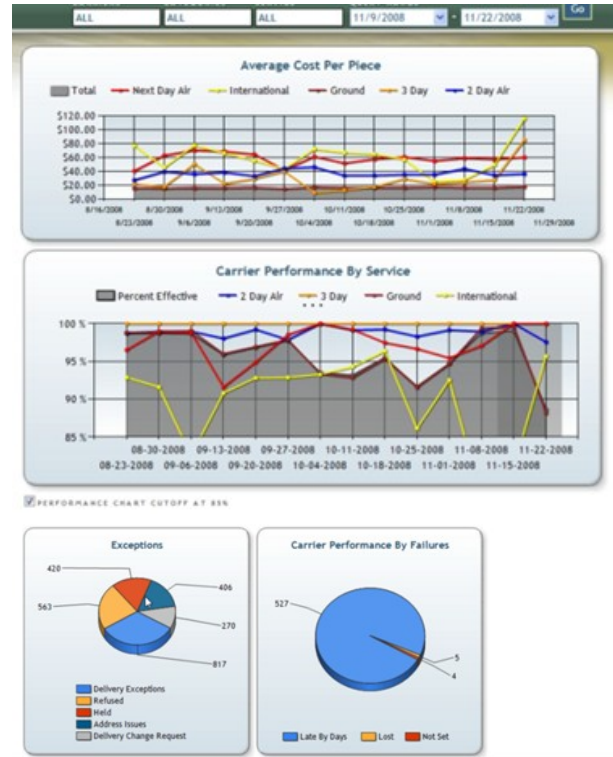

Monitoring carrier accountability, invoice overcharges and visibility at the executive seat to make strategic, money-saving decisions are easy with **InvoiceSaver™**, the graphical, interactive way to manage logistics and carrier accountability.

**Don't just trust your carriers. Know exactly what's going on.**

Ranked as Baltimore's eighth fastest growing privately held company by the Baltimore Business Journal, PA & Associates has been **negotiating world class small package carrier agreements** for their customers for 18 years. The company has been featured by Microsoft in *Success Stories* and USAir's Sky Radio for the show *Industry Innovators — Best of Breed*. Building on the success of **LogisticsSaver™**, our outsourced bid and negotiation for world-class carrier agreements, **InvoiceSaver™** provides visibility into service levels, invoicing and internal spend management; all in an easy-to-use online portal.

**Our InvoiceSaver™ service offering includes:**

- **Carrier Agreement Compliance:** do you trust that your carrier is charging you the correct rates and surcharges or do you know? Know for sure by using our software to monitor their charges.
- **Service Refunds:** If you randomly track or audit your carrier invoices for guaranteed service

refunds, you're missing valuable opportunities to recover money you're entitled to. We monitor every package and file claims for credits.

- **Proactive Notification of Distressed Shipments:** Bypass the carrier-provided solutions for proactive notification, as these are dependent upon the carrier inputting information into their systems. Real-time shipment monitoring and modeling allow for proactive alerts, even when the carrier doesn't input exception information.
- **Executive-level Reporting for Additional Savings:** Our reporting provides valuable "drill down" views into key trends that allow you to make data-informed business decisions for operational efficiencies.

# InvoiceSaver

Contact us for more information or a demonstration of InvoiceSaver™ and manage your logistics like a world-class organization.

InvoiceSaver™ features a suite of audit and recovery tools that monitor some of the well-known and not-so-well-known areas for potential over-charges and incorrect charges. Key areas include:

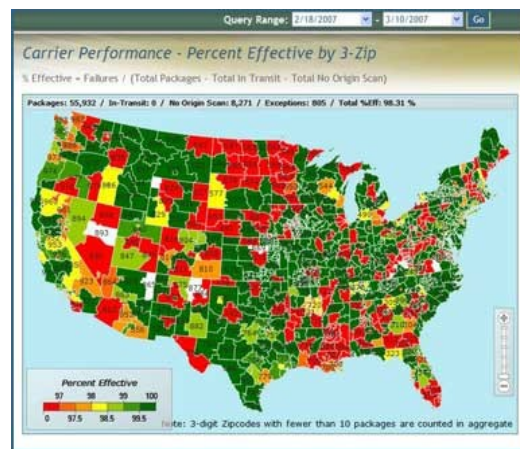

## Service Failure Refunds

We offer the option of having us claim these, or providing you with the information to claim them at a lower cost to you. If a package is late or lost you will receive a credit.

## Carrier Accountability

Know more about the carriers' operations and problems than your carrier representative with our analysis tools and monitoring.

## Contract Rate Audit

Billing errors by the carrier can represent a significant savings opportunity. We also find all packages that were billed but not shipped.

## Potential Savings Identification

We identify areas within your own organizations shipping practices that offer substantial savings opportunities. These are constantly monitored so the new opportunities are presented to you immediately. This tool may also be used for proactive notification of distressed shipments
