

You have a world class carrier agreement.

**BEST IN CLASS
SOLUTION**

The savings have just begun.

Take the guess work out of how to best leverage the discounts in your carrier agreements. **PA TMS** is a full-featured Transportation Management System that gets it right — every time.

As with our other innovative **3 part logistics spend management** offerings, we've changed the rules of the game. Meet **PA TMS**; a full-featured, enterprise-level, web-based Transportation Management System with the lowest total cost of ownership available today.

PA TMS combines all of the functions of carrier provided systems without the expense of additional shipping station hardware, software and maintenance in a single shipping station. Save money, time and work space and the hidden costs of carrier systems (FedEx TechAwards or UPS Customer Technology Program).

Author enterprise business rules for the rating and routing of shipments with support for automated

THREE PART
LOGISTICS SPEND MANAGEMENT
LogisticsSaver | PA TMS | InvoiceSaver

decisions based on least-cost routing, transit time routing and the ever-blurring line of Ground, Hundredweight and LTL service.

Eliminate errors and additional keying labor with direct integration to ERP or WMS and automate manual aspects of the shipping operation to reduce labor requirements. Its all part of **PA TMS**.

As with our other 3 part logistics spend management offerings, PA TMS can be tied directly to a return on investment through these cost reduction areas:

- Dramatic freight and parcel cost reductions through rate shopping and mode optimization
- Ensure supplier, client and carrier compliance
- Reduce chargebacks
- Streamline distribution center operations
- Enforce enterprise business rules
- Real-time decision making and exception handling
- Reduction of labor through automation of manual tasks
- Shipment consolidation, hundredweight, LTL decision points
- Direct ERP integration enables real-time reporting and improves cash flow. No batch processing
